## Industrial RO Plant

We offer a wide range of industrial Reverse Osmosis plants which comes at a flow rate from 200LPH.

Our industry professionals utilize the company resource for incorporating efficient water treatment mechanism for commercial buildings and industries. The range is designed as per the set industrial norms and clients specification.

### Features

- ▶ Excellent functioning
- ▶ Fully automatic operation
- ▶ Long operational life
- ▶ Less maintenance
- ▶ Durable body structure

## Sewage treatment

Counted amongst the leading entities of this domain, we are affianced in offering manufacturing, supplying, and exporting Sewage Treatment Plant.

We design and manufacture the plant using quality material and innovative techniques that help the plant last for thirty years easily. Clients can get the plant installed from us at cost effective price.

### Features

- ▶ Easy operation
- ▶ Automatic control
- ▶ Can be buried under the ground
- ▶ Convenient maintenance

## Water Treatment

(Iron Removal/Softener/DM Plant)

We specialize in manufacturing and exporting an extensive range of Iron removal, Softner, DM Plant. Our water treatment system is used in various big and reputed industries due to its reliability and best results.

### Features

- ▶ High speed large gravity flow
- ▶ Automatic control panel
- ▶ Adjustable water leveling equipment

## Swimming Pool Filtration Systems

We are engaged in offering a wide range of swimming pool filtration plant. These systems are acknowledged for engineering efficiency and high tech workability. The products are manufactured using premium quality raw materials procured from registered vendors across the globe.

For maintaining purity standards of all types of swimming pools, these systems are efficient and are good cleansing products. For managing proper sanitation system and for killing infectious microorganism like bacteria, virus and varied oils in the pool, we offer circulation pumps in our products.
